

TABLE 1

Same	Import	Import	Same	Import/Add to folder	Same	Same	Same	Same	Import	Same	Match to List	Same	Import	Import	Import	Import	Import
Always: 1	Date and time of import in this format: 2019-02-05 8:16	Title	Always: google-listed	Image to be stored here like this example unless you know another way? https://www.whatsonyarravalley.com.au/wp-content/uploads/bulk/46491865_2343418765730964_21844422023593132644-n.jpg	Always: [claim_ownership]	Always: publish	Always: open	Always: open	same as post title just with hyphen ...eg Daytime-Soundbath	Always: event	Each city gets its own number. See sheet. So when we run a warburton scrape all events would be 59. See attached sheet for city codes	Always: Road Map	Address from listing	Date from listing in this format... 06/02/2019	time from listing in 24hr time like this. 11:00 or for a night time 23:00	Name of venue. Retrieved from	Link from Google under 'source'.

Same	Import	Same	Same	Same	Import	Import
Always: 1	Mobile or phone number from venue. Found when the location is clicked.	Always: 13	Always: 197	Always: 9	For the map to display correctly I got these from https://www.latlong.net But maybe you can extract this from the venue address in the source code? Without this, the map displays incorrectly.	For the map to display correctly I got these from https://www.latlong.net But maybe you can extract this from the venue address in the source code? Without this, the map displays incorrectly.
